SUMMARY

Computer Engineering student at IOE Pulchowk Campus and full-stack developer who builds web and mobile apps end to end. AWS Certified Solutions Architect – Associate with backend and DevOps internship experience, interested in cloud infrastructure and applied AI. I also teach and mentor, including cloud sessions at LOCUS.

EXPERIENCE

Freelance Full-Stack Developer Present

- Build and deploy websites and apps for clients, owning each feature from first sketch to production.
- Delivered a live restaurant website with an admin site that lets staff publish content without a developer.

Backend and Platform Intern · Ninja Infosys Sep 2025 – Nov 2025
Kathmandu · Hybrid

- Worked on back-end web development as part of the platform team.
- Supported DevOps tasks for deployment and day-to-day operations.

Event Manager · IT Club, Pulchowk Campus Jun 2025 – May 2026

- Helped run technical events for the campus IT club, including a 3-day Linux and cybersecurity workshop and a five-day Introduction to Engineering session.
- Mentored first-semester students at a 2-day Git and GitHub workshop.

Instructor, Software Fellowship · LOCUS 2027, Pulchowk Campus 2026

- Taught "AWS Cloud and Deployment" in the Cloud Fellowship run with the AWS Student Builder Group, covering cloud fundamentals, service and deployment models, and AWS.
- Built the session slides and received a Certificate of Appreciation as an instructor.

EDUCATION

Bachelor of Computer Engineering · Pulchowk Campus, IOE, Tribhuvan University Jul 2023 – Present
Lalitpur, Nepal

PROJECTS

Gantabya – Group Trip and Trail Platform elsendero.netlify.app · github.com/Abhiyan31415/Elsendero
React, Node.js, PostgreSQL, Socket.IO

- Started at KU HackFest 2024 and grew into a deployed app with an interactive trail map, route planning and place search.
- Trip events with real-time group chat and secure login; Dockerised API on its own server.

Janakpur Fish House – Restaurant Website and Admin janakpurfishhouse.com
React, Node.js

- Live client website with a filterable menu, photo gallery, news section and contact form.
- Login-protected admin site so staff can publish gallery photos and news.

Evolutionary Creatures – Genetic Algorithm Simulation github.com/ankitrajmehta/genetic_algo
C++, SDL2

- Team of two; 500 creatures with neural-network brains evolve over 100 generations through selection and mutation.
- Live visualisation of the population and replay of the best creature.

CogniCare – Dementia Care App github.com/anujpaude1/dementia
Flutter, Django REST, WebSockets

- Team of five; patient and caretaker app with medicines, appointments and live location with a safe-zone alert.
- Voice companion that listens, answers with an LLM and speaks back.

HACKATHONS & ACHIEVEMENTS

- **Winner, Tech Auction** (COESIS, 2026): team coding competition where we solved programming problems to earn credits and spent them to bid in the auction; our team placed first.
- **1st Runner-Up**, 4th National Telemedicine & 1st National Digital Health Conference hackathon (2026): with a team of 4, built the DDA Drug Registration Portal, where applicants file drug dossiers with Nepal's Department of Drug Administration and reviewers assess and approve them online.

CERTIFICATIONS

AWS Certified Solutions Architect – Associate · Amazon Web Services Jul 2025

Advanced Learning Algorithms · DeepLearning.AI Jan 2025

Annual Nepal AI School · AI Nepal 2024

Supervised Machine Learning: Regression and Classification · DeepLearning.AI, Stanford Nov 2023

Developing Back-End Apps with Node.js and Express · IBM / Coursera 2023

SKILLS

Languages: JavaScript, TypeScript, Python, C++, Dart, SQL, Go (learning)
Frontend & mobile: React, Next.js, Vite, Tailwind CSS, Material UI, Flutter, Firebase
Backend & APIs: Node.js, Express, FastAPI, Django REST Framework, Supabase, REST APIs, Socket.IO and WebSockets, JWT authentication, Redis
Databases & AI: PostgreSQL, pgvector, MongoDB, RAG and LLM APIs, embeddings, speech-to-text, machine learning
Cloud & DevOps: AWS, Docker, Linux, Nginx, Netlify, Git and GitHub
Other: Mapbox GL, Figma, teaching and mentoring, event and team management
